CONDUIT ACCESSORIES

DIGNITY STAR PLASTIC INDUSTRIES LTD.

Company Information

FOR THE PAST

Dignity Star Plastic Industries Ltd. was established in 1992 in Hong Kong.
In order to expand our productivity ability we invested our Dongguan factory with 16,000 square metres in the same year. Our production teams include mould production, extrusion, PVC injection, electric injection and assemble departments. We use good quality of steel for mould production so that all the products come out will look with good furnishing. We also insist on using high impact of PVC raw material for producing our conduit accessories because for all the fittings installed inside the concrete must be unbreakable, mostly all the installed accessories are permanent installation and cannot remove or replace easily, for this reason we use brass insert for all our wall boxes and junction boxes.

FOR PRESENT

We have full range of electrical accessories items for construction customers to choose. PVC conduit accessories products are rustless and no need to install earth terminal. Nowadays, electrical technicians need to install electrical accessories with standard size, efficient to install and complete their projects safety. All our products' sizes are complied with BS or IEC standard specifications.

FOR FUTURE

In the near future, Dignity will focus on new electrical items innovation. To cope with the market expansion, we will upgrade our products' production in order to gain more markets with competitive prices and we will keep on producing PVC electrical accessories with good quality and standard products to our overseas customers.

Frame Type Series

Allow clients to combine different custom combination of modules, hidden screw design to match with your family decoration, super slim Acrylic flat plate, copper or silver colour plate are available.

–Outstanding aesthetic surface which are produced using fire–proof polycarbonate material
–More safety.
–More brightness to keep longer time of brightness.
–More conductivity by phosphor contact material.
–Less heatime for conducter terminals.

DR & DE Series

Simple product profile for modern life, with high quality product at competitive prices, an ideal choice for decoration projects.

Products Features

–More safety and reliable by sophisticated products design.
–Ultra–large switch button design, good hand feeling, easy switch operation.
–High quality copper applied for low electrical resistance and good conductivity.
–Unique fastener type wiring terminal for safe connection.

78000014	DE263-01W	13A 250V 2 Gang Socket With Switch –Outboard	86x86x29mm	PB1/5 /50

Extension Socket

Simple, clear & elegance product appearance, offer clients an easy and safe wiring solution for various countries.

Product Features

–Children protection cover to keep your children safe.

–High quality conduction copper sheet, flame resistant PC outer material.

–Clients have sufficient option for wire length, 3 metres or 5 metres.

TESTING REPORT
