Life Is On

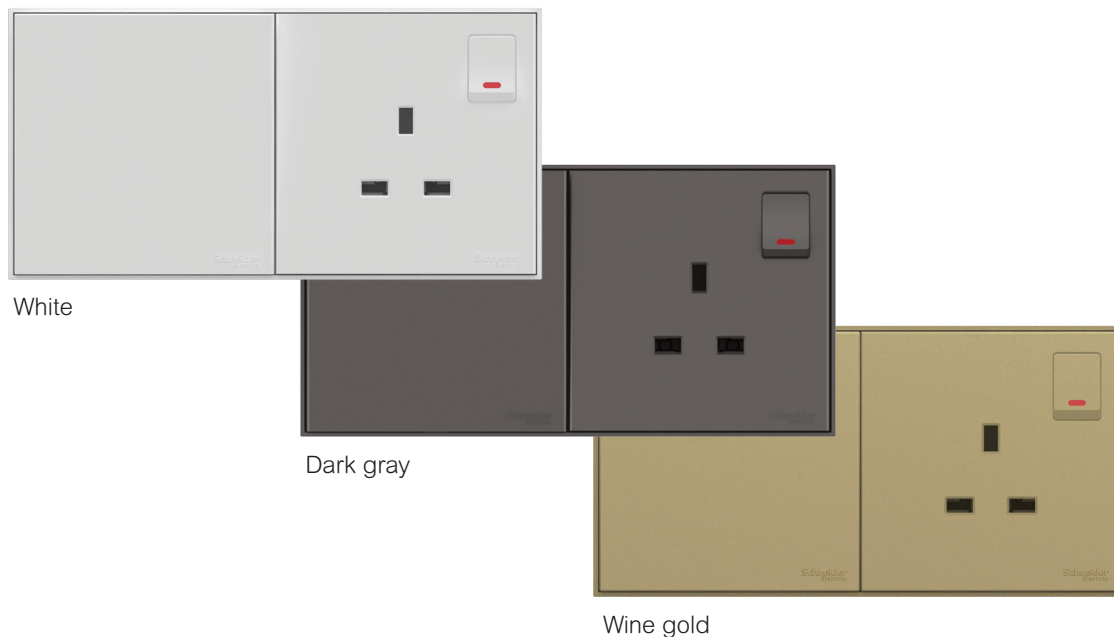

A style unto itself – AvatarOn C

The **AvatarOn C range** of switches and sockets delivers the latest in design trends. Created by the award-winning designers at Schneider Electric, it exquisitely complements any interior while bringing enhanced functionality.

- **Comes in many variants**, from single units to five-module frames for more complex uses, and in three different colors to match your interiors.
- **Enhanced functionalities** with USB, TV, and other ports available for even the most discerning homeowner and a soft-clicking sound to avoid disturbing light sleepers.
- **Easy-to-install**, compact modules that fit standard wall boxes, and are designed to meet global as well as local safety and environmental criteria.

A trendy look with timeless features

Interested in the latest design trends for your home? Look no further.

AvatarOn C switches and sockets have a clean, frameless design which gives them a light, floating feel. The cover plate offers a tactile experience that's soft and slender atop a base that's strong and robust.

All devices are available in three stylish colors and with matte finishes, adding a modern touch to your home's walls.

Designed with care

There are times when even the slightest sound can cause unwanted disturbances. That's why AvatarOn C switches are designed with a soft-click action so as not to disturb even the lightest sleeper.

*"Attractive, classy
design? Count me in."*

Advanced functionality for everyday convenience

The AvatarOn C range offers a wide variety of functions for your home, with everything from single switches and sockets to multi-module frames. The range also includes outputs which allow you to connect your TV antennas and Ethernet cables, or control fans and dim lights for extra convenience.

The USB ports are compatible with types A and C inputs and are fully compliant with the latest quick charging standards and protocols. This way you can power up your phone or other devices in no time.

Mix and match

Tired of using messy extension cords? Frustrated by the jungle of cables behind your home entertainment center? AvatarOn C lets you combine up to five wiring devices in a frame. Mix power outlets with Ethernet ports and cable TV signal inputs into single support frame to match the look and feel of your other AvatarOn C wiring devices.

A certified solution with hassle-free installation

AvatarOn C's ingenious design and compact size make it relatively easy to install in a variety of wall boxes, while the large terminal ports in the back make wiring hassle-free. The upshot? A simpler, faster installation for your electrician.

AvatarOn C products also carry the Green Premium™ ecolabel. Green Premium stands for Schneider Electric's commitment to providing innovative products, solutions, and services that help our customers balance their carbon footprint.

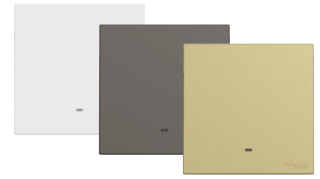

All electrical products are required to comply with International Electrotechnical Commission (IEC) standards, but AvatarOn C goes beyond that. The range is designed and tested to exceed IEC ratings to help make your home future-ready, with enhanced electrical safety.

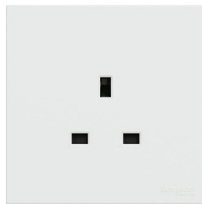

*"Timeless colours
and modern design.
This switch ticks
all the boxes."*

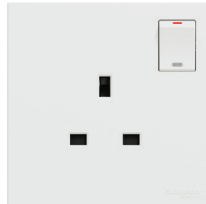

The AvatarOn C range

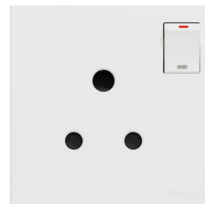

Available in three colors – white, dark gray, and wine gold.
